

Senior Product Designer. AI Prototyping & Design to Code Workflows

Senior Product Designer with **9+** years experience across financial services and regulated digital products. At Aegon UK, I designed pension and investment experiences for a platform serving **3.75M+** customers and helped scale a design system to **21,000+** tracked component insertions. Experienced in product design, accessibility, design systems and AI assisted prototyping.

Areas of Expertise

Product & Workflow Design

Problem Framing • Product Discovery • Complex Workflows • User Flows • Information Architecture • Interaction Design • User Journeys • Complex Interfaces • Responsive Web • Product Design

AI, Prototyping & Experience Design

Functional Prototyping • Figma Make • Codex • Lovable • User Research • Usability Testing • Accessibility • Complex Forms • Data Visualisation • Design QA & UAT

Collaboration & Delivery

Figma • GitHub • Design to Code Workflows • Product & Engineering Collaboration • Stakeholder Workshops • Technical Constraint Resolution • Design Systems • Component Governance • Design Delivery

Career

Senior UI Designer | Aegon UK | Aug 2022 - Aug 2026 | London, UK

UK investment and pensions platform serving 3.75M+ customers | Part of a 25 person UX team.

- Designed complex journeys for one of the UK's largest pensions and investment platforms, helping improve user experience for 3.75M+ customers.
- Led modernisation of shared interaction patterns across forms, status, feedback and layout, contributing to 21,000+ tracked component insertions across product teams.
- Form patterns alone reached 6,300+ tracked insertions across the company design system, while shared status, feedback and layout components reached 12,300+ insertions.
- Took 15 Core Components through design and engineering governance, working with Product, UX Research and Engineering through implementation, QA and UAT.
- Trained 5 designers through Figma Fundamentals and mentored a graduate designer over 7 months.

Founder & Director | Sophie Purewal Design | Jul 2017 - Aug 2022 | London, UK

Independent design studio | servicing 3 key clients across digital product and UX/UI design.

- Led the design life cycle of responsive digital products from ambiguous problems through user flows, interaction design, prototyping, validation and implementation.
- Worked directly with clients and developers to challenge assumptions, define scope and turn complex business and operational problems into clear, usable product experiences.
- Ran my own design business, managing projects and client relationships while designing digital products, content and branding for three key clients.

Selected client engagement | VLE Support | UX & UI Designer | Jun 2018 - Oct 2018

UK education software provider for FE, training and higher education | with 200,000+ active learners.

- Designed a role based placement platform connecting students, coordinators, employers and operations teams across complex workflows.
- Owned journeys, information architecture and core workflows, progressing from early concepts and wireframes through interactive prototypes and responsive high fidelity interfaces.

UI Design Mentor | Contract client | CareerFoundry | Aug 2017 - Aug 2022 | London, UK

Global online education platform serving 14,000+ enrolled students.

- Taught and mentored 140+ UX/UI and Product Design students over 5 years, covering interaction design, accessibility, usability, visual design, prototyping and portfolio development.
- Designed learning experiences for UI and UX courses for a global education platform serving 14,000+ enrolled students.

Selected Product Projects

ChartStudio | A Figma plugin for building charts | May 2026 - Present

- Identified a recurring data visualisation problem and independently shaped the product from problem definition through UX, interaction model and polished UI.
- Used OpenAI Codex to build a functional Figma plugin, iterating the UX and implementation together through user testing.

PlacePath | A responsive web app for multiple user roles | May 2026 - Present

- Reimagined a complex placement management platform as a modern role based product, defining product workflows, information architecture and responsive interactions across multiple user groups.
- Took the product from ambiguous requirements and workflow concepts through high fidelity UI to a working interactive product using Codex, GitHub and AI assisted build workflows.

Education

AI Prototyping Bootcamp | DesignLab

Certification in Graphic Design | Shillington

BA (Hons) Ancient History and Archaeology | University of Liverpool
