

Senior Product Designer • Design Systems • AI Prototyping

sophiepurewal.github.io • linkedin.com/in/sophiepurewal • sophiepurewaldesign@gmail.com • London, UK

Summary

Senior Product Designer with almost a decade of experience designing complex digital products, accessible customer journeys and scalable design systems, with a strong foundation in UI craft. Experienced working across product, engineering and stakeholder teams, from discovery, requirements gathering and early product definition through user flows, prototyping, high-fidelity design, developer handoff and UAT. Combines product thinking, visual design and design-system expertise with practical experience using AI-assisted prototyping tools.

Areas of Expertise

End-to-End Product Design | Complex Digital Journeys | Interaction Design | User Flows | Discovery & Requirements | Prototyping | Design Systems | Accessibility & WCAG | Stakeholder Facilitation | Product and Engineering Collaboration | Developer Handoff | UAT & Design QA | Figma | AI-Assisted Prototyping

Key Achievements

- Redesigned a public-facing salary sacrifice calculator, translating complex pension contribution requirements into a clearer regulated journey and making customers' options easier to understand.
- Built and modernised reusable Figma components supporting more than **21,000 tracked insertions** across product teams, reducing duplicate design effort and helping teams create more consistent interfaces from approved patterns.
- Led discovery-to-delivery UX and UI design for the first phase of the ePlacements platform, defining MVP functionality through research, personas, user flows, low-to-high fidelity prototypes, usability testing, preference testing and A/B testing.
- Strengthened design capability by mentoring five designers through Figma training and supporting a graduate designer over seven months.

Career

Senior UI Designer • Aegon UK • Aug 2022 – Present • London, UK

- Translated complex pension contribution requirements into a clearer public-facing calculator experience, collaborating with stakeholders and delivery teams within a regulated environment.
- Owned Core Component redesigns from initial problem definition through peer and engineering review, component documentation and shared-library release, reducing duplicate UI effort and improving cross-team consistency.
- Progressed 15 redesigned Core Components through design and engineering governance into the shared Figma library, strengthening the quality and reliability of approved reusable patterns.
- Strengthened design capability across the wider team by mentoring five designers through an internal Figma Fundamentals course and supporting a graduate designer over seven months through Figma practice, creative brainstorming and UAT.

Founder & Director • Sophie Purewal Design • Jul 2017 – Aug 2022 • London, UK

- Founded and operated an independent design studio delivering product, UX, UI, brand, responsive web and app design for clients.
- Delivered end-to-end product design from discovery and research through to wireframes, high-fidelity interfaces, prototypes, design systems and developer handoff.

Selected client engagement: VLE ePlacements • UX & UI Designer • Jun 2018 – Oct 2018

- Led discovery-to-delivery UX and UI design for the first phase of a work-placement platform supporting learning providers, students and employers.
- Defined core product flows and MVP functionality through collaborative research, personas, user flows, low-to-high fidelity wireframes, prototype testing, preference testing and A/B testing.
- Delivered responsive UI across mobile, tablet and desktop, including visual concepts, style guidance, grids, typography, iconography, interactive prototypes and final assets for handoff.
- Strengthened client design maturity through clearer design processes, documented decisions, collaboration tools and improved handoff practices.

UI Design Mentor • Contract client: CareerFoundry • Aug 2017 – Aug 2022 • London, UK

- Mentored students and UX professionals transitioning into UI and Product Design careers through portfolio reviews, structured feedback and design coaching.
- Improved student outcomes through guidance on visual hierarchy, layout, typography, colour, usability, accessibility and prototype quality.
- Edited and rewrote UI for UX course materials, increasing clarity and alignment with current design practice.

Selected Product Innovation**ChartStudio, an AI-Assisted Figma Plugin • May 2026 – Present • Active Development**

- Identified a recurring workflow gap for designers creating consistent data visualisations in Figma, defined and prototyped an AI-assisted plugin supporting responsive bar, line and doughnut charts.
- Defined the product concept, UX, feature requirements, configuration model and visual design system independently.
- Used OpenAI Codex and AI-assisted development workflows to prototype functioning plugin capability, demonstrating practical experience bridging product design and software development.

Certifications & Memberships

AI Prototyping Camp • Designlab

Certification in Graphic Design • Shillington

Graphic Design Short Course • UAL

BA (Hons) Ancient History and Archaeology • University of Liverpool

Member • Women in Banking and Finance (WIBF)
