Contact Details

Each contact will be an editable widget incorporating contact details data points 1–9.

Each contact widget will contain an edit icon (three dots) that expands upon click into an edit pattern drop down allowing the user to edit, save or open the contact dialogue frame for said contact.

All contacts are scrollable/ loadable.

Main contact can be selected via a star icon or similar.

It would make sense to have placements under Contacts or vice versa at the bottom.
